PROFILE As a passionate and innovative React.js Developer, I recently graduated from a top-tier coding bootcamp and have a strong desire to build responsive and scalable front-end applications. With a solid foundation in modern web development technologies, I excel at translating design wireframes into high-quality code. Proficient in React.js, JavaScript, HTML5, CSS3, and responsive design principles, I am also experienced in state management libraries like Redux and Context API. I have a good understanding of RESTful APIs and asynchronous request handling, as well as version control systems like Git. Additionally, I have a basic knowledge of back-end technologies such as Node.js and Express.js. In my capstone project, I developed a fully functional e-commerce web application with features like product listings, shopping cart functionality, and user authentication. I also collaborated on a real-time chat application using WebSocket and created a custom component library in React. I received recognition for my problem-solving skills and attention to detail, and I continue to stay engaged in the React.js community through meetups and open-source projects. I am constantly updating my skills through online many courses.

EDUCATION Jan 2021 — Present **Diploma, High School**

SKILLS	HTML5	React.js
	CSS3	Redux
	JavaScript	Next.js 14
	Git&Github	PHP

LANGUAGES	Arabic	Native speaker	English	B1
-----------	--------	----------------	---------	----

INTERNSHIPS Sep 2023 — Oct 2023 **React.js Devoloper, SyncIntern's** Cairo

COURSES	Sep 2023 — Dec 2023	CS50x, Harvard University
	Dec 2023 — Present	Next JS: The Complete Developer’s Guide, Stephen Grider
	Mar 2023 — Jun 2023	React 18 Tutorial and Projects Course (2023), John Smilga
	Dec 2022 — Feb 2023	The Complete JavaScript Course 2024: From Zero to Expert!, Jonas Schmedtmann
	Sep 2022 — Dec 2022	Build Responsive Real-World Websites with HTML and CSS, Jonas Schmedtmann
